Recap of Part 2

- Massive Updates in June Release
- Data Collections
- Graphics
- Installable Packages

Windows 8.1
Featured apps

It's All About **Solving** Pain!

- How do I integrate the UWP **Command Bar** to execute one set of event handlers?

- How do I integrate the latest crash reporting from Microsoft called **Hockey App**?

- How do **master/detail page relationships** work in App Studio code?

- You want a **Navigation bar** in your app? And search?

- You want to write an app that functions completely in **Airplane mode**, once it is cached is created? If you are a UWP coder, you won't want to miss this caching topic.

- "IT'S HUGE", like one of the local car dealers says on his TV ads! We will also show you how to setup the **Ad Client** using App Studio and look at the generated XAML!
